

# APPLIANCE INSTALLATION

## Additional Charges - Electric Oven and Electric Cooktop

The requirements for installation may vary depending on the layout, location and structure of your house. If extra work needs to be done, extra charges will apply. Your installer will explain the reasons and requirements for the additional charges (if there are any) before proceeding.

### The most common reasons for additional costs are:

- Installation of new power points (from \$150)
- Installation of new power circuits (TBQ)
- Installation of shelves for ovens (from \$100)
- Installation of new stainless steel surrounds for ovens and cooktops (from \$275)
- Installation of timber and stainless steel panels (from \$150)
- Installation of new colour-matched timber surrounds for ovens (from \$150)
- Installation of new colour-matched timber panels for integrated appliances (from \$250)
- Cutting timber benches and oven surrounds (\$100)
- Cutting stone, granite and stainless steel benches (\$150)

*TBQ = to be quoted*

**Note:** your installer will explain the reasons and requirements for the additional charges (if there are any) before proceeding.

### Peace of mind installation

The quality of your installation plays a big role in the maximum efficiency, safety and long term reliability of your oven and stove.

When you arrange your installation through us, we guarantee the services of a licensed installer who specialises in oven and stove installations. Don't risk your investment with anything less!

When the installer calls you, please discuss the location where you need your appliance installed. If some of these extras mandatory and you choose to not proceed, there will be a \$99.00 non-refundable call out fee once the installer visits your home.

**Please note:** service includes installation only. Appliances not included.
