7. To have the frame connected, assemble the frame by pushing downward while connecting two rods at a time, giving it an extra force.

- When the frame is complete, repeat step 7 from all angles, as shown in the image.

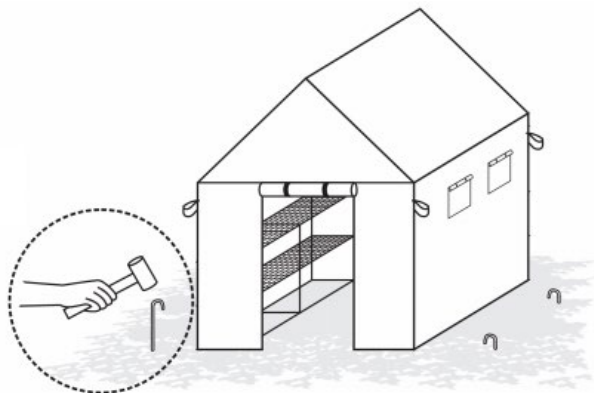

This will result in a tighter and smaller frame enabling the greenhouse cover to slide on easily.

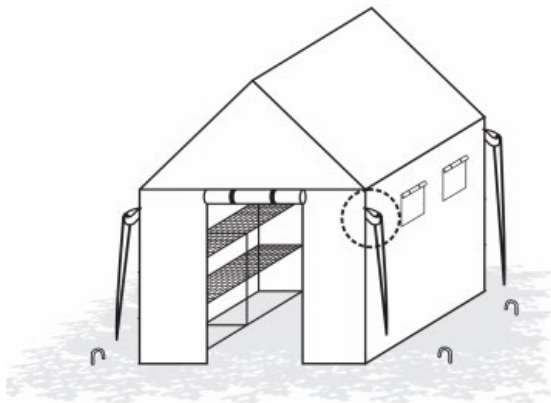

- Once completed, place the cover **Y** over the frame and attach.

Assemble the Anchor Kit

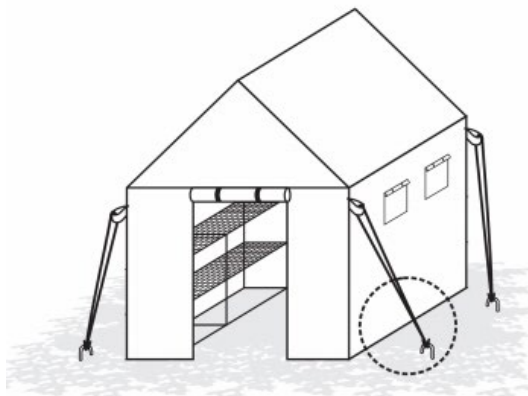

- Hammer the anchors into the soil, placing them on all four sides of the greenhouse.

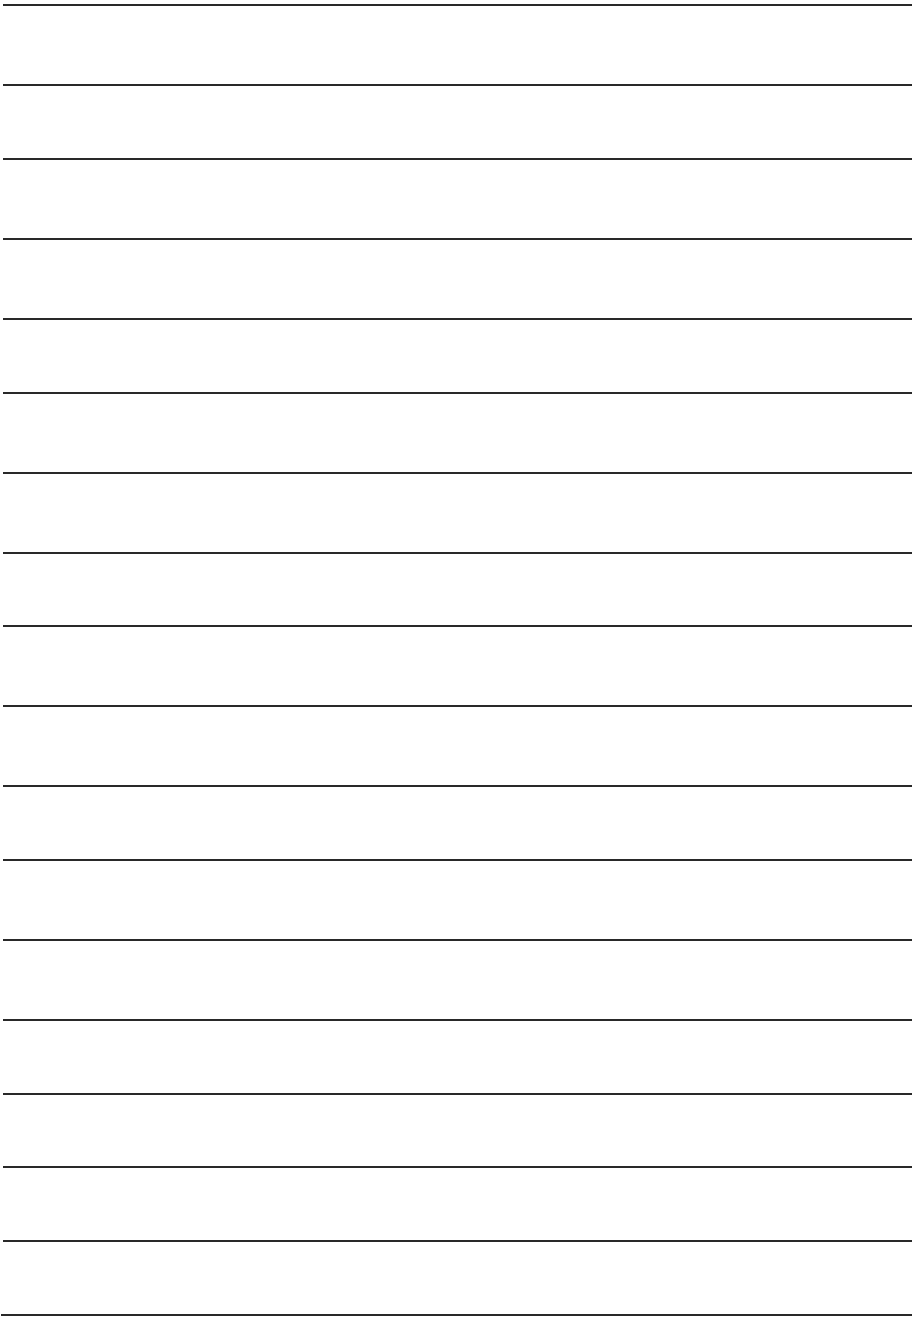

2. Connect the top end of the rope to the greenhouse strap as shown in the image. Repeat this step for all four sides.

3. Take the other end of the rope and pass it through the bent side of the anchor as shown in the image. Repeat this step for all four sides.
